

REMARKS

Claims 16 and 19 to 51 are pending in this application.

Applicants thank the Examiner for allowing all claims 16 and 19 to 51.

A substitute specification was requested because the Preliminary Amendment filed by Applicants included multiple amendments to the specification and resulted in potential confusion. Accordingly, Applicants are filing herewith a Substitute Specification (including the Abstract, but not the claims) which includes those amendments detailed in Applicants' Preliminary Amendment. No new matter has been added. A Marked Up Copy Of The Substitute Specification comparing the original Specification and the Substitute Specification accompanies this Amendment. In the Marked Up Version, underlining indicates added text and strikeouts indicate deleted text. Approval and entry of the Substitute Specification (including Abstract) is respectfully requested.

CONCLUSION

In view of all of the above, it is believed that the Substitute Specification is in a condition for allowance. It is therefore respectfully requested that any objection to the Specification be withdrawn, and that the present application issue as early as possible.

The Examiner is respectfully encouraged to contact the undersigned via telephone if such communication might advance allowance of the present application.

Respectfully submitted, *By: Andra D. Shney*
